MOVIE REVIEW

MRS. HARRIS GOES TO PARIS

Genre: Comedy, Drama

Director: Anthony Fabian

Runtime: 1h 55m

Rating: ☆☆☆☆

Everything starts in London, where a housekeeper, Ada Harris, falls totally in love with a Dior dress. So, she decides that she wants to have one of her own. Ada Harris (the main character) sets her sights on an attractive Dior dress in one of the houses where she works as a housekeeper. Clearly, it is not a piece of luxury fashion she can afford, but Ada was so determined to have it for herself, even if it meant working hard to buy herself a ticket to Paris and shop for her dream dress.

After she works and takes a chance to raise the funds to pursue her dream, she goes on an adventure to Paris. However, landing in Paris with lots of cash is not enough to own such a desired piece of designer fashion. It is a pleasure that is reserved only for the rich and the famous. When Ada shows up uninvited at the Dior center of operations in Paris, she sets off on a chain of unexpected events.

American director Anthony Fabian transports us into Ada's world quite brilliantly from the very first scene. The movie was shot in different locations in London, Paris and Budapest. It is a world where no good effort goes without consequences. English actress Lesley Manville makes it so easy for us to root for Ada, who dreams bigger than her means and goes all out for strangers without expecting anything in return.

Manville's interpretation is so authentic and charming that she makes us live every emotion of her character. ***Mrs. Harris Goes to Paris*** proves that it is never too late to follow one's dreams, and Mrs. Harris's dream came true. MY BLOG

MY LIFE

By Sussie Adams

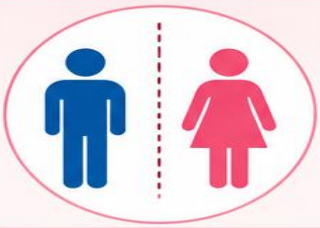

Recently I had the opportunity to travel to one of the most beautiful countries in the Americas. With stunning Pacific and Caribbean coastlines, mountains, volcanoes, waterfalls, lakes, and islands, Costa Rica is an environmentally friendly country with a strong commitment to preserving natural resources.

Costa Ricans, or *Ticos* as they call themselves, tend to be proud, friendly, and diverse people who enjoy sharing their culture and social activities with newcomers. It is the place of *pura vida* (pure life), a contagious attitude of living life to the fullest. *Ticos* are happy and easygoing people, always ready to have fun or laugh at a good joke.

They place a great importance on friendship and loyalty towards their friends and family. In fact, family is the basic element of society. Many young adults live with their parents until they get married, and even then, they will try to remain close to their parents. Mealtimes are often filled with passionate conversations on a variety of subjects and may stretch into weekend lunches. Sharing among extended family members is deeply appreciated.

Masculine and feminine roles are clearly defined in Costa Rican society, which sometimes includes *machismo* (the idea that men have more authority than women do). However, the increasingly active participation of women in politics as well as in economic activities has enormously contributed to the development of society.

31) What is Sussie doing in her blog?

A) Describing her last trip to Costa Rica.
B) Describing Costa Ricans' cultural traits.
C) Mentioning tourist places to go in Costa Rica.
D) Writing about what she dislikes about Costa Ricans.

32) How does Sussie start her blog?

A) Describing the way Costa Ricans are
B) Describing the places where she stayed
C) Writing some cultural misunderstandings
D) Mentioning the natural beauties of Costa Rica

33) Which of the following sentences is true about Costa Rican culture?

A) Costa Ricans are open to foreigners.
B) Machismo is strongly present today.
C) Women do not get involved in political issues.
D) Costa Ricans are reserved when sharing their culture.

34) Which aspect is considered fundamental in Costa Rican society?

A) Education
B) Friendship
C) The family
D) Young generations

35) What cultural pattern has changed among men and women?

A) Women are more active in political issues.
B) Young men leave their homes at a young age.
C) Women are now the center of Costa Rican culture.
D) The *machismo* culture has increased considerably.

OSA CONSERVATION

People. Nature. A Sustainable Future.

Founded in 2003, Osa Conservation is a nonprofit organization dedicated mainly to protecting the globally significant biodiversity of the Osa Peninsula.

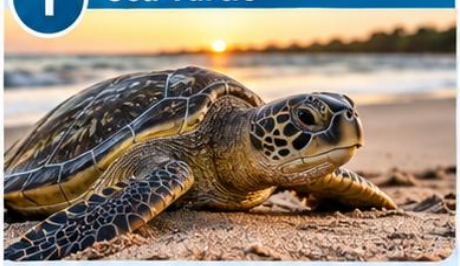

We protect Osa's natural ecosystems by:

- creating biological corridors for local wildlife
- managing and protecting the Osa National Wildlife Refuge
- building successful models for private conservation
- restoring damaged and degraded ecosystems

"Healthy Ecosystems. A Stronger Tomorrow."

Our Projects

1 Sea Turtle

Our sea turtle conservation program monitors the nesting activity, predation rates and hatching success of these incredible species. Our staff and volunteers gather important population and reproductive data and deter poachers who collect turtle eggs for consumption or sale.

2 Camera Trap

In 2013, the National University (UNA) and Osa Conservation created the Camera Trap Network for the Osa Peninsula. This initiative, now the largest camera trap array in Costa Rica, is composed of NGOs, hotels, eco-lodges, and private landowners that are willing to contribute to the research and conservation of the wild cats and their prey in the Osa Peninsula.

3 Forest Restoration

We provide oversight of the Osa National Wildlife Refuge (ONWR) and actively protect and manage a 1,400-acre reserve along the Esquinas River, which includes forest and mangrove habitat, essential to many migratory birds and other wildlife.

RATINGS AND REVIEWS

Sara Peyton, November 22, 2022: ★★★★½

Honestly, I love Pinterest. It is so good and has so many different things. Recipes, book and movie recommendations, cozy pictures. There is one slight problem: whenever I click on a picture of something, almost every single time, hundreds of similar pictures show up.

Tamara Smith, November 12, 2022: ★★★★☆

I really enjoy using the app. It is very good for searching for references, getting inspiration, and ideas. I have been a Pinterest user for many years; it rarely disappoints me. However, I switched to a new phone not so long ago, and for some reason, it does not open here. It is just endlessly loading the start menu. It still works on my other devices but does not work on the new one. I probably need to update it.

WHAT IS WEARABLE TECHNOLOGY?

Wearable technology, or "**wearables**", is the name for electronic devices people can wear as accessories, implant in their clothing, or even in their body. Wearables are hands-free gadgets with microprocessors and a connection to the Internet.

Wearables have existed for hundreds of years. Pocket watches, which later became wristwatches, or glasses, were some of the first examples in the history of wearable technology. People wear them to make life more comfortable, and they still do. Glasses help you see, and watches give you helpful information. However, modern wearable devices are more complicated. They are electronic, and they use the Internet to collect, store, and send information.

or glasses, were some of the first examples in the history of wearable technology.

Modern wearable devices are more complicated.

The first popular electronic wearable technology was fitness trackers, which became popular in the 2010s. They monitor people's hearts and movements and help them keep fit.

Now, wearable technology helps people stay healthy in new ways. For example, the ITBra is a patch that women wear inside their bras, and it checks for breast cancer. SmartSleep is a soft headband that helps people to sleep better. It collects information about people's sleep patterns, gives advice, and makes sounds to help people fall asleep.

However, not all wearables are about health. Some are used for protection or to find the place you want to go, and some are just for fun. For example, you can buy smart jewelry. These rings and necklaces can change color to match clothes or make-up, or they can send a police alert if you are in danger.
